SKILLS

Front-end:

HTML5, CSS3, JavaScript, TypeScript, React, Redux, Bootstrap

Back-end:

Node, Express, RESTful APIs, MySQL/PostgreSQL

General:

Git, testing with Jest and Enzyme, Debian Linux, Photoshop

PROJECTS

[Super Meter Arcade](#) — Ecommerce Site

- Full-stack ecommerce shopping site. Features user new registration and product searching/filtering.
- Uses TypeScript, React, Redux, Node/Express, and SQL.
- I made this site to improve with SQL databases, and to gain more experience with TypeScript and Redux.

[Portfolio Site](#) — My personal Website

- Personal site for viewing my skills, projects, and contact information.
- Uses TypeScript, React, and AWS Lambda functions.
- On this site you can find write-ups for each of my projects with more details about the development process and the challenges I had to overcome.

[React Video Game](#) — A simple video game

- Pick up the items to increase your score before the timer expires.
- This was one of my earliest React projects. I learned a lot about component lifecycles and performance while making it.

[The Verge Top Stories](#) — The top stories from theVerge.com

- Get the top trending stories from TheVerge.com.
- Uses a web API, Node, and Express.
- This was my first solo website. I made it a long time ago to learn more about using web APIs and responsive styling.

[Visit my website to see more of my projects!](#)

EDUCATION

Red Rocks Community College — Associate of Science Degree

01/2013 - 05/2015
